

CREATE AND CONFIGURE IBM CLOUD SERVICES

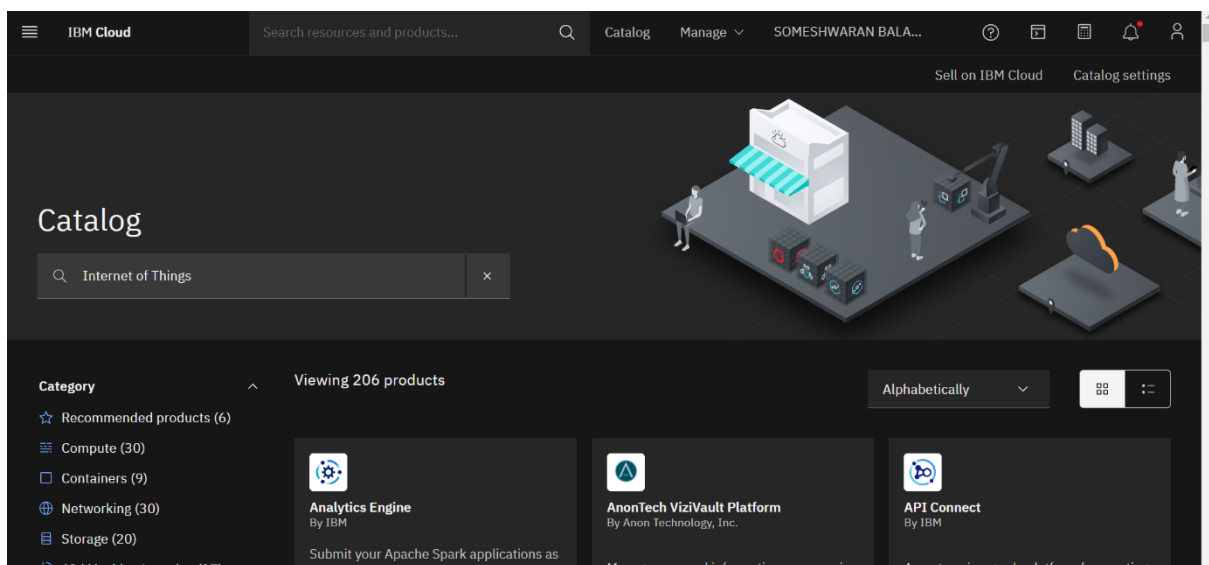

Creating IBM Watson IOT Platform and a Device

Date	27Oct 2022
Team ID	PNT2022TMID26547
Project Name	Project -Smart farmer-IOT enabled smart Farming Application

Step:1 Log in to IBM Cloud Using Registered Id

Step:2 Click on the Catalogue And Search For Internet of Things

Step: 3 Choose the Location As London, Select Free Plan and Click Create Button

The screenshot shows the IBM Cloud 'Internet of Things Platform' creation interface. The 'Create' tab is active, showing a 'Select a location' dropdown set to 'London (eu-gb)' and a 'Select a pricing plan' section. The 'Lite' plan is selected, which includes up to 500 registered devices and a maximum of 200 MB of each data metric. A summary panel on the right shows the plan details and a warning about existing Lite plan instances. A checkbox for 'I have read and agree to the following license agreements' is visible at the bottom right.

Internet of Things Platform **Free**

Location: London
Plan: Lite
Service name: Internet of Things Platform-zd
Resource group: Default

Existing Lite plan instance
You can have only 1 Lite plan instance of this service per resource group. [Delete](#) your current Lite plan instance in Default resource group to create a new one, or [view the existing instance](#).

☐ I have read and agree to the following license agreements: [Terms](#)

Plan	Features	Pricing
Lite	Includes up to 500 registered devices, and a maximum of 200 MB of each data metric	Free

Step: 4 Click on Launch Button Then Your IBM Watson IoT Platform Will be Opened

The screenshot shows the 'Browse Devices' page in the IBM Watson IoT Platform. The page displays a table of devices with columns for Device ID, Status, Device Type, Class ID, and Date Added. Two devices are listed: one with ID 12345 and another with ID 54321, both marked as 'Disconnected'. The page includes a search bar, a 'Device Simulator' toggle, and pagination controls.

ID: 17lsro

Browse Action Device Types Interfaces

Add Device

Identity Device Information Security Summary

There are two options for selecting a device authentication token.

Auto-generated authentication token (default)

Allow the service to generate an authentication token for you. Tokens are 18 characters and contain a mix of alphanumeric characters and symbols. The token is returned to you at the end of the device registration process.

Authentication Token 4546466435 ⓘ

Make a note of the generated token. Lost authentication tokens cannot be recovered. Tokens are encrypted before being stored.

Authentication token are encrypted before we store them.

Self-provided authentication token

Provide your own authentication token for this device. The token must be between 8 and 36 characters and contain a mix of lowercase and uppercase letters, numbers, and symbols, which can include hyphens, underscores, and periods. Do not use repeated characters, dictionary words, user names, or other predefined sequences.

Step:7 click on Next & Finish Button Ur Device Will Be Added
